Netzwerk Studienqualität Brandenburg

Certificate of Attendance

ROBERT RICHTER

successfully participated
in the higher education didactics workshop event

Starter Kit Teaching in Higher Education

The event was conducted by Netzwerk Studienqualität Brandenburg (sqb) in cooperation with Bereich “Lehre und Medien” (ZfQ/Universität Potsdam) on **September 30, 2026** in an in-person format and comprised 8 learning units (AE*) in the thematic area "Key Competencies for Teaching."

Lecturer: **Dr. Merlinda Dalipi**

Learning Outcomes

At the end of the workshop, participants will be able to

- apply selected tools and approaches for planning and structuring courses and teaching sessions,
- consciously integrate their role and self-understanding as instructors into their teaching practice,
- identify factors that support motivating and effective learning environments,
- select appropriate methods for different teaching and learning situations,
- transfer workshop content and impulses to their own teaching contexts.

* One learning unit (AE) corresponds to 45 minutes.

Potsdam, 01. Oktober 2026

Workshopinformation

Starter Kit Teaching in Higher Education

Effectively planning and delivering university courses involves a variety of complex tasks, such as addressing an audience of students, aligning examinations with learning objectives, and developing appropriate didactic concepts, translating theoretical approaches into practical teaching, and considering the specific characteristics of each learner group. These challenges are particularly pronounced for those new to teaching.

The Starter Kit Teaching workshop supports instructors who are new to teaching in higher education and would like to strengthen their confidence and orientation in teaching practice. Teaching at university involves more than delivering content – it includes creating meaningful learning experiences, considering the needs of diverse learner groups, and making informed didactic decisions.

The workshop offers a practical introduction to key concepts of higher education teaching and provides space for reflection on participants' own teaching roles and experiences. Participants will explore selected approaches and tools for planning and structuring teaching, discuss challenges commonly encountered in university contexts, and develop ideas that can be transferred directly into their own teaching practice.

Special attention will be given to questions such as: How can learning outcomes support course design? How can learning environments be structured in an engaging way? What role do communication and cultural aspects play in teaching and learning?

Continuing Education Content

- Practical approaches to planning and structuring teaching sessions
- Selected instructional design models (e.g. Constructive Alignment, Didactic Reduction)
- The role and self-understanding of the instructor
- Creating motivating and engaging learning environments
- Cultural aspects in teaching and learning
- Reflection on participants' own teaching contexts and experiences
